

Order Code: JM-252C

PRO MIG 250 Inverter Compact

The Jasic MIG 252 Compact is equipped with powerful IGBT components, a digital A/V display and multi process capabilities.

The inverter offers excellent welding characteristics and consistently reliable performance for highly demanding and repetitive weld cycles.

This high quality single-phase machine delivers an impressive 250 amps at 35% duty cycle, making the MIG 252 Compact an excellent choice for medium duty fabrication work.

Optional

Spool Gun JSG-02

MMA Leads
WCS25-3WEL

Key Features

- High performance compact MIG/MAG/MMA inverter
- Advanced control circuitry
- Digital A/V display
- High duty cycle
- Suitable for 0.6, 0.8 and 1.0mm welding wire
- Stable and reliable arc
- Burn back control
- Spool gun interface
- Wire inching feature
